PROFESSIONAL EXPERIENCE

BI developer

Online Casino MostBet (iGaming / Limassol / Remote) – June 2023 to Present

- Built 30+ ClickHouse data marts for product, marketing, and financial analytics
- Designed and maintained 70+ Apache Airflow DAGs (ETL, data ingestion, alerting) – *reduced metric calculation time by 60%*
- Integrated Telegram, Rocket.Chat, and Email alerting into pipelines – *improved incident response SLA by 40%*
- Automated reporting using Superset (40%) and Power BI (60%) – *reduced manual work for analysts by 4 hours per day*
- Analyzed 10+ A/B experiments with Python & statsmodels – *improved key monetization metrics by 4–7%*
- Developed a Streamlit-based CRM app – *reducing ad-hoc report requests by 10%*
- Created an AI-powered Telegram bot (LLM + Docker) for navigating internal documentation – *improved support accuracy and reduced response time*

BI Analyst

MamaBrands (eCommerce / Moscow / Hybrid) – November 2021 – April 2023

- Set up a data warehouse on BigQuery, integrating data from 1C, OZON, Wildberries, Bitrix24
- Automated ETL pipelines using Python and Apache Airflow – *replacing manual Excel workflows*
- Built 15+ Power BI dashboards for marketing, sales, and logistics teams
- Implemented competitive price monitoring by parsing websites via Selenium, resulting in a consolidated pricing dashboard
- Developed a demand forecasting model with Etna – *achieved 86% prediction accuracy*
- Contributed to a product recommendation system – *leading to a 10% sales increase*

Analyst

AUTO-BUYER (Logistics / Moscow / Office) – November 2019 – November 2021

- Automated management accounting from scratch using 1C UNF – *eliminated Excel reporting and reduced manual workload by 80%*
- Built a mentorship program for the accounting team – *improved onboarding and knowledge transfer speed*
- Developed Python-based ETL pipelines integrating 1C data via API – *reduced report update time from 3 hours to 15 minutes*
- Integrated geospatial analytics using osmnx and geopandas – *optimized logistics routes*
- Created Power BI dashboards covering PL, CF, accounts receivable, and cost metrics – *improved variance analysis and issue detection*
- Designed a budgeting model tailored to seasonal and operational variables
- Delivered ad-hoc dashboards for executive team – *profit breakdowns, client segmentation, and cost analytics*
- Participated in investment project evaluations – *developed 5+ financial models with NPV, IRR, and ROI calculations*
